

SPiNTRANET™

THE INTRANET SOLUTION FOR GENERAL PRACTICE

DESIGNED BY GPs FOR GPs.

- ▶ IF YOU'RE WORKING IN GENERAL PRACTICE, YOU DON'T NEED TO BE TOLD THAT WORKLOADS CAN BE HARD TO MANAGE. MAYBE YOU'VE EVEN FANTASISED ABOUT HAVING YOUR OWN SUPER-EFFICIENT PERSONAL ASSISTANT TO HELP TAKE THE STRAIN. THE KIND WHO'LL...

...remind you of every meeting and appointment – pass on messages to team members and keep them notified of key tasks – have the right documents to hand just when you need them – produce appraisal documentation for you – track income streams and streamline the budgeting process – keep you up to speed with the latest in evidence-based medicine.

GPIntranet™ is a new web-based application that does all this and more. Designed by Dr Jan du Plessis, a full-time GP working in southwest England, all the tools it offers have been extensively trialled in a busy surgery. GPIntranet™ has proved so successful that it's now being made available to other practices across the UK.

▶ HELPING YOU TO MODERNISE

ALMOST ALL GPs NOW USE THE INTERNET ON A DAILY BASIS, MAKING A WEB-BASED APPLICATION THE IDEAL SOLUTION WHEN IT COMES TO IMPROVING THE EFFICIENCY OF THE WAY WE WORK.

GPIntranet™...

...is a breeze to use, with no need to learn complex new application skills. It comes pre-installed on its own hardware, with automatic maintenance and updates provided by the GPIntranet™ team, providing secure online back-up of all data on dedicated servers, freeing up space on your own internal system.

"GPIntranet™ has improved communication within our surgery, especially between clinical and non-clinical staff. Being very user friendly meant all members of our team could use it straight away..."

Debbie Marshall – Practice Manager, Park Medical Centre, St Austell

"GPIntranet™ brings together the tools needed throughout my working day, saving me time. It is great to use software that actually helps you, and works the way you do..."

Dr Dan Rainbow – General Practitioner, Stennack Surgery, St Ives

"Easy to use and fun sharing my holiday pics!"

Sarah Weaver – Receptionist, Cape Cornwall Surgery, St Just

"All the features in GPIntranet™ have been developed to meet the real day-to-day needs of our surgery's busy team. Over the past two years, the system has been thoroughly tested for practicality and ease of use in the most demanding of environments – our practice itself. Why do we think GPIntranet™ will make your working life a lot easier? Quite simply, because that's what it's done for us."

Dr Jan du Plessis
General Practitioner and
GPIntranet™ designer

KEEP YOUR TEAM CONNECTED

MESSAGE BOARD + iMAIL + SMS

--

GPIntranet™ GIVES YOU FLEXIBLE OPTIONS TO COMMUNICATE WITH YOUR TEAM MEMBERS, BOTH INDIVIDUALLY AND AS A GROUP.

MESSAGE BOARD

Got something that all your team should know about? Simply post it on the GPIntranet™ Message Board. Messages can include rich text, hyperlinks and images – you can even choose font colours and use a spell-check.

INSTANT MESSAGING

This feature lets you send individual messages to any member of your team currently online. Online members are displayed in your screen's right panel – simply click on their name to send a message straight to their screen or mobile phone. They'll receive an alert, enabling a prompt response.

iMAIL

This fully featured internal mail system allows you to send both group and individual iMails at the click of a mouse. Messages can be flagged up as tasks and passed on to other team members to be completed later. iMail can also generate automatic reminders of significant events, audits and clinical meetings, with all messages archived for easy retrieval and audit.

--

ORGANISE YOUR DAY

TASKS + CALENDAR

--

THE SHEER VOLUME OF APPOINTMENTS, MEETINGS AND TASKS TO BE CARRIED OUT IN A TYPICAL GENERAL PRACTICE CAN SOMETIMES SEEM OVERWHELMING. WITH GPIntranet™, IT ALL BECOMES A LOT EASIER TO MANAGE.

TASK LIST

This handy tool keeps track of activities in a busy surgery. The Task List is integrated with Instant Messaging and iMail, making it easy to pass on tasks to other members of staff. The due date of tasks can be set and revised and you'll be reminded when a task is overdue. Once a task is completed, it's archived for ease of audit.

CALENDAR

Anyone who's ever missed an important date will appreciate this tool, which makes it easy to keep on top of events. Today's events are listed in the right panel of your screen and you can also create custom categories of events to view separately. The calendar will remember your favourite categories, with private entries only visible to the user who created them.

STREAMLINE MEETINGS

Agenda items can be added to upcoming team meetings, streamlining the meeting process and avoiding the common problem of an agenda that's out of date by the time the meeting takes place. An on-screen icon reminds users of all upcoming meetings.

RAPID ACCESS TO KEY DOCUMENTS

DOCUMENT STORE + iDOCS

FINDING THE RIGHT FORM OR SET OF GUIDELINES JUST WHEN YOU NEED IT CAN BE A REAL HEADACHE. THE DOCUMENT STORE IS A SIMPLE YET SECURE WAY FOR YOU TO ARCHIVE, RETRIEVE AND SHARE ALL KINDS OF ELECTRONIC DOCUMENTS THAT YOU AND YOUR TEAM MIGHT NEED.

EASILY UPLOAD ALL DOCUMENT TYPES

Any document can be easily uploaded to GPIntranet™, including MS Word, Excel, PowerPoint and PDF files. What's more, all files are automatically backed up on the system's secure servers.

EFFICIENT ARCHIVING AND RETRIEVAL

Documents can be archived by category and sub-category for ease of retrieval and a document counter keeps track of their use. Users are alerted of new documents relevant to them. Sensitive files can be locked so that they are only visible to selected users.

SHARING AND TRACKING KEY DOCUMENTS

Need a response to new guidelines? Just send an iDoc to selected team members. All documents viewed are tracked to be included in your appraisal summary. GPIntranet™ can also keep track of review dates for guidelines and protocols, reminding you when these are due.

TAILOR THE SYSTEM

ADMIN PANEL + PORTABLE LINKS + ADDRESS BOOK + VOICE TOOL

GPIntranet™ CAN BE CUSTOMIZED TO SUIT INDIVIDUAL USERS, ALLOWING YOU TO CHOOSE THE WAY DOCUMENTS ARE VIEWED AND THE TOOLS AVAILABLE ON YOUR SCREEN'S RIGHT PANEL, FOR INSTANCE. YOU CAN ALSO ADJUST THE 'LOOK AND FEEL' OF GPIntranet™ TO YOUR PREFERENCES.

USER ADMINISTRATION

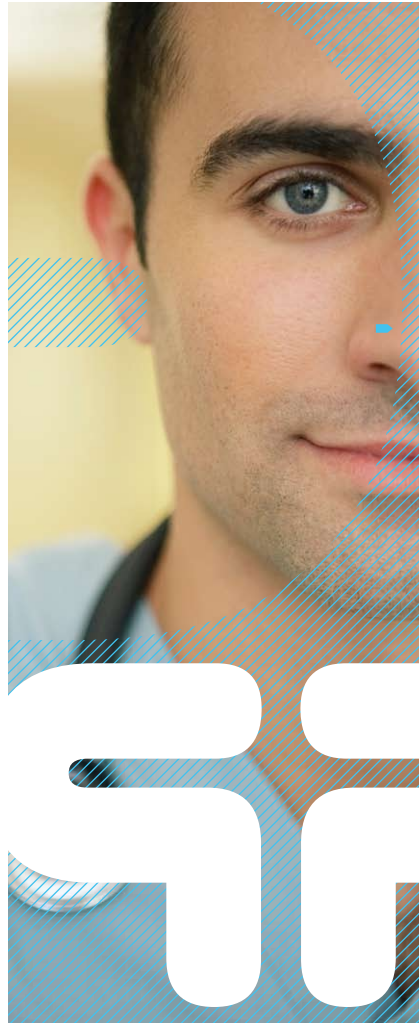

The user administration tool can be used to edit or delete user account information and set custom access to different areas of the site. Updates are installed automatically via the web.

WEB LINKS AND CONTACTS

Wherever you log on to GPIntranet™, your favourite internet links will be there for you. You'll also be able to use a fully featured address book with all your contacts, including email, web addresses and a free text area where you can make notes on contacts. This is especially useful for practices with surgeries in more than one location. All entries are searchable from the Address Book or via the Site Search tool.

GPIntranet™ VOICE

A fully featured MP3 dictation system comes embedded with GPIntranet™, allowing you to make quick and accurate records of referrals, meetings, etc. (no more inaudible or lost tapes!). This tool can be used with a USB foot pedal to enable easy transcription.

TAKE THE PAIN OUT OF APPRAISALS AND EARNINGS ANALYSES

APPRAISAL TOOL + MY dBASE

--

APPRAISAL TOOL

This allows you to generate an Appraisal Document in MS Word format with just one click. You have total control over the content and the document can be printed or emailed to your appraiser. The Appraisal Tool can capture PUNs & DENs, significant events, clinical meetings, referral rate statistics, Choose & Book, emergency admissions, urgent referrals, medical reports and minor surgery. It will also list all documents reviewed and evidence-based articles read during the previous year.

MY dBASE

This is an area of GPIntranet™ where your daily activities can be recorded. Clinicians can keep track of referrals, medical reports, minor surgery, acupuncture, significant events, clinical meetings and clinical audits. All these records can be distributed to selected members of staff and are used when generating an appraisal document. MY dBASE can also calculate earnings from enhanced services, like minor surgery and accidental injuries, on a monthly basis and offers a tool to manage medical reports and keep track of payment for these. If a payment is overdue a member of the admin staff will be informed.

--

EBM

KEEP UP TO DATE WITH EVIDENCE-BASED MEDICINE

--

IT CAN BE HARD TO KEEP ON TOP OF THE LATEST DEVELOPMENTS IN EVIDENCE-BASED MEDICINE (EBM), ESPECIALLY IF YOU HAVE TO KEEP REVISITING WEBSITES TO CHECK FOR UPDATES. USING RSS (REAL SIMPLE SYNDICATION) TECHNOLOGY, GPIntranet™ DOES THIS FOR YOU, SCANNING THE NET FOR UPDATES AND BRINGING THEM STRAIGHT TO YOUR SCREEN.

RSS NEWS TICKER

The RSS News Ticker brings you the latest EBM information from more than 12 sources and is always visible in your screen's right panel. Sources include BMJ, NICE, Clinical Evidence etc. GPIntranet™ also gives you links to a large selection of additional RSS feeds from various sources to read online, including management and nursing links.

LIVE DATA CAPTURE

GPIntranet™ captures information regarding the evidence-based medicine you have read online, your use of the Document Repository and searches you've made online using the search tools on the site – all very useful data when generating your appraisal document.

--

CLINICAL CALCULATORS

CLINICAL CALCULATORS AT YOUR FINGERTIPS

WITH GPIntranet™, A RANGE OF POWERFUL CLINICAL CALCULATORS ARE NEVER MORE THAN A CLICK AWAY.

eGFR CALCULATOR

The estimated glomerular filtration rate calculator uses both the MDRD and Cockcroft-Gault formulas. Simply enter clinical information to retrieve an up-to-date management plan from the UK Renal Foundation website based on your patient's calculated eGFR. It also provides the correct read-codes needed for the nGMS contract.

JBS CARDIAC RISK CALCULATOR

The Joint British Societies cardiac risk calculator is used daily in making important decisions regarding clinical management. It displays calculated risk in graphic form which can be printed for patients to take away.

PHQ-9 CALCULATOR

This generates a one-page Word document which can be included in the patient's clinical records, helping to optimise management of patients with depression or mood disorders. Management guidelines are automatically generated.

SHARED CARE PRESCRIPTION TOOL

This helps minimize risk when prescribing Methadone, Buprenorphine and Dexamphetamine to substance-misuse patients. After medication collection dates and doses are entered, the prescription detail is generated and can be copied into your clinical software. An alert is displayed if a potentially inappropriate dose or combination of medication is prescribed.

Other calculators include predicted peak flow, spirometry reference value, temperature / weight / height conversion, pregnancy wheel and alcohol unit calculator.

SUMMARY

MESSAGE BOARD + INSTANT MESSAGING + TASK LIST + EMAIL + SMS + DOCUMENT REPOSITORY + CALENDAR + ADDRESS BOOK + IMAGE GALLERY + INTERNET LINKS + CLINICAL CALCULATORS + IMPORTANT PATIENT LIST + EBM RSS FEEDS + ONLINE JOURNALS + ONLINE SEARCH TOOLS + APPRAISAL TOOLS + ADMINISTRATION PANEL + CUSTOMIZABLE

The logo for GP Intranet features a stylized 'G' icon followed by the text 'PINTRANET' in a bold, sans-serif font, with a trademark symbol (TM) to the upper right.
